

HOW EXCESSIVE PRIOR AUTHORIZATION HURTS PATIENTS

BOTULINUM TOXINS treat diseases such as

Migraine Disease

Dystonia

Blepharospasm

A new policy is making medication **HARDER TO ACCESS** by requiring prior authorization for these treatments under Medicare and Medicaid.

EXCESSIVE PRIOR AUTHORIZATIONS MEAN

Paperwork **consumes time** needed for patient care

Patients' treatment is **delayed**

COVID-19 **pandemic challenges** are compounded

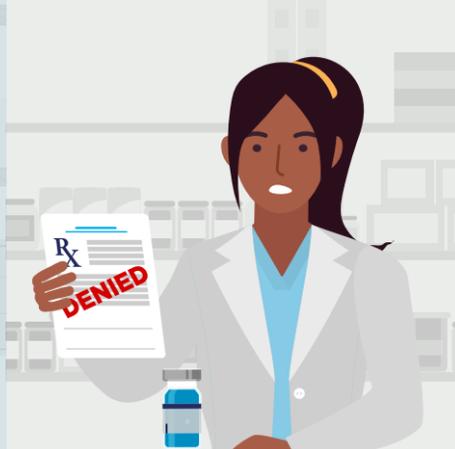

New prior authorization requirements **NEGATIVELY AFFECT PATIENTS**

Patients are **confused** about the change in procedure

Patients are **losing control** of their disease

Patients are **denied treatment** their health care provider prescribed

EXCESSIVE PRIOR AUTHORIZATIONS **BLOCK AND DELAY NECESSARY CARE.**
