

WHAT STANDS BETWEEN PATIENTS & TREATMENT FOR RARE DISEASES?

PRIOR AUTHORIZATION DELAYS

Health plans may require **onerous paperwork** before a patient can get treatment.

STEP THERAPY

People with rare diseases may have to try an **insurer-preferred drug** before getting the medication prescribed by their health care provider.

CO-PAY ACCUMULATOR PROGRAMS

Insurers may change their rules about co-pay cards or not allow them at all, leaving patients with **unmanageable out-of-pocket bills**.

Rare disease patients face daily challenges. **Access to treatment shouldn't be one of them.**
