

# THE U.S. FACES A SHORTAGE OF UROLOGY CARE WORKERS

## A POPULATION QUICKLY AGING.

The number of senior Americans is estimated to reach **60 million** by 2030 and continue growing.

## A WORKFORCE FALLING BEHIND.

Only **38%** of U.S. counties have a urologist, and their median age is 55.

## MORE THAN 1 MILLION NEW HOME CARE PROVIDERS ARE NEEDED

by decade's end to help elderly patients with urologic needs.

## MEETING THE COUNTRY'S FUTURE UROLOGY NEEDS

requires workforce investments.
