

BIOLOGICS, BIOSIMILARS & CANCER CARE

EXPERT PERSPECTIVES

SANJAY JUNEJA, MD
Chief of Oncology,
Baton Rouge General Hospital

KATHY OUBRE
Board of Directors,
Community Oncology Alliance

CLAIRE SAXTON
Vice President, Patient Experience,
Cancer Support Community

BIOSIMILARS IN ONCOLOGY

“The more familiar we are with biosimilars, the more we can say with confidence: ‘I feel comfortable with them.’”

SANJAY JUNEJA

“The main thing that helps patients and caregivers feel more confident is **knowing that they’re safe and effective**. Hearing that from their oncologist, a trusted source, is key.”

CLAIRE SAXTON

SUPPORT FOR PATIENTS & PRACTICES

“Two barriers to patients being comfortable with biosimilars is that **patients were afraid of the unknown and that some clinicians were uncertain about biosimilars**, and that made patients more uncomfortable and uncertain.”

CLAIRE SAXTON

“If we had better transparency, that would increase access to care, lower health care costs and be better for the patient and their families.”

KATHY OUBRE

ACCESS TO CARE & PRECISION MEDICINE

“What hurts is when you aren’t able to use precision medicine in a timely manner and it **leads to a terrible situation for the patient.**”

SANJAY JUNEJA

“We were able to provide therapeutic agents at a lower price point to our patients, thereby making it more affordable. We saw a 23% increase in access to care.”

KATHY OUBRE

“ Trust between an oncologist and a patient is both important and delicate.”

SANJAY JUNEJA
